Re: Solvents Recovery Service of New Jersey
Linden, New Jersey

Dear Sir:

On December 14, 1979 representatives from the U.S. Environmental Protection Agency (EPA) Surveillance and Analysis Division visited the Solvents Recovery property. While no immediate environmental hazard was found at the facility, there may be health hazards for plant personnel due to prolonged exposure to different types of solvents. In order to determine if any occupational hazards do exist, it is requested that OSHA inspect the facility in the near future.

Your cooperation is very much appreciated.

Sincerely yours,

Richard Ramon
Sanitary Engineer
Hazardous Waste Site Investigation Program
